And, too, since there are some flaws that deserve being exposed, it must be added that Klaw & Erlanger are themselves to be censured for deliberately using one of their scenes to advertise a big mercantile es-tablishment in New York-a feature of the production which tends to cheapen the thing in the eyes of many people.

The deep girdle now accompanies every modish spring frock and waist, and one of the prettiest finishes for it is a row of small buckles up and down the front. The deep cuffs, which are also an almost invariable accompaniment of the fashionable bodice, shows the same finishing touch.

New girdle buckles are of varying lengths,

tween seven and eight inches. The prettiest of the later designs are sharp-pointed ovals in gun metal set with rhinestones. The same design is shown in oxidized silver and gilt, and oblong and round buckles are also spending a few weeks at French Lick, has in the girdle displays. The narrow neck ruches which enjoyed a

New Orleans Times-Democrat. Woman's work in art dates as far back as the first woman. Prehistoric man devoted his energies to hunting animals and destroying his neighbor. Prehistoric woman in the privacy of the domestic cavern invented the arts of weaving and pottery, which first rudely supplied the needs of her housekeeping, and later became the medium through which her awakening artistic sense could express itself. Dr. Mason, of the Smithsonian Institution, finds that the savage women have had a large share in creating the esthetic arts. In painting, dyeing, molding, modeling, weaving and embroidering, in the origination first of geometric patterns and then of freehand drawing, savage women, primitive women, have won their title to our highest admiration. Modern woman, as compared with her savage sister, labors under the handicap of false ideals of art that have been created in the intervening centuries. It is humiliating to be told, and to be compelled to believe, that there are points in which we are inferior to prehistoric women; but the recognition of deficiencies is the first step toward remedying them; and when our general ideas of art are as just, in their own way, as were those of our sisters of the primitive ages,
